

**Radon Gas Management
Board of Education
Wrightstown Community School District**

The Wrightstown Community School District is committed to ensuring a safe and healthy environment for staff, students, and community members. As part of the Indoor Environmental Management Plan, the district is committed to protecting employees and students from the hazards of radon gas exposure.

The District tests all buildings and classrooms for radon gas. All facilities were assessed to be below the 4pCi/L levels. The District will test any new buildings that are built in the future for radon gas and determine if testing needs to be completed with major renovations to any buildings.
