

PROJECT PROGRESS REPORT

OCTOBER 2020

WHAT'S NEW?

Planning meetings continued throughout the month, as well as meetings with elementary school teachers to review classroom layouts for each grade level.

Interior designers from Bray presented preliminary concepts for the interior appearance of the middle school addition and renovation. It was important that the new materials and finishes introduced in this project complement the existing finishes that will remain.

WHAT'S NEXT?

- Meetings will continue in the next month to refine the overall concept.
- The Bray team and engineering consultants will complete a 70% progress set of construction documents (plan drawings) in early November.
- Coordination meetings will be planned with the plumbing, heating/cooling, and electrical engineers to update the District on how their systems will be incorporated into the existing and new portions of the buildings.

Planning & Design Highlights

- The elementary school plan concept will include an outdoor courtyard space in the center of the building. The main function of this space is to allow natural light into all of the learning spaces.
- The outdoor courtyard will also be used for large group assembly, flexible table seating, and interactive activities for the students to enjoy in a secure environment.
- The kitchen consultant presented an update of the renovations at the elementary school and the new kitchen at the middle school for final comment and review. Kitchen improvements will greatly impact how students are served, as well as the functional use of the kitchen.
- The interior design concept goals of the middle school include creating a warm and welcoming cafeteria space to be used for various functions throughout the school day.
- The new middle school office will offer a welcoming environment for students and visitors.
