

PROJECT PROGRESS REPORT

SEPTEMBER 2020

WHAT'S NEW?

This month's meetings included many staff/department groups such as Special Education, Art, Music, Choir, Physical Education, Office, Guidance, and Technical Education. These meetings focused on the elementary and middle school to review specific details for each of the spaces. Design discussions will continue for the next few months with follow-up meetings.

Interior designers from Bray presented preliminary concepts (shown on Page 2) for the interior appearance of the elementary addition and renovation.

WHAT'S NEXT?

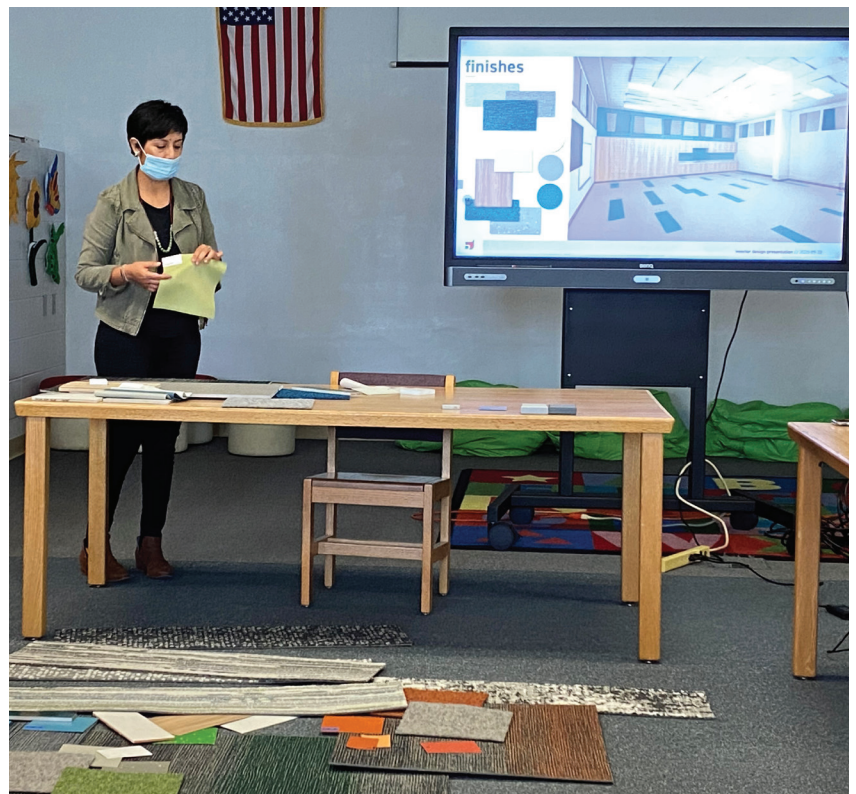

- Meetings will continue to refine the overall concept, as well as to begin discussing construction scheduling and sequencing for all projects.
- Construction at the elementary school will span from Spring 2021 until August 2022. The team will work together to prioritize construction tasks during the summer months, while also planning how to provide a safe environment for the students during construction.
- Plumbing, heating/cooling, and electrical engineers will be meeting in the buildings to review paths and space available for new mechanical piping and equipment installation within existing building spaces.

Planning & Design Highlights

- Meeting discussions involved understanding teachers' needs for arranging their spaces, including marker boards, tack boards, technology, and cabinets and storage within the rooms.
- Meeting groups discussed which types of flooring would be preferred in each space.
- The goal of the interior concept is to create a safe place that gives the students and staff a sense of community, as an extension of their home and neighborhood.
- Interior materials and finishes in the building will need to provide a long-lasting life cycle for the District, in addition to being welcoming and timeless.
