

# PROJECT PROGRESS REPORT

SUMMER 2020

## WHAT'S NEW?

Since the successful April 7 referendum, the District has been hard at work, developing plans to provide students with a safe learning experience while also preparing for the future.

The District and its partners are ramping up the planning and design efforts to address safety and security, infrastructure, and capacity needs across the district. To the right, you will find key process highlights and milestones for April-July 2020.

## WHAT'S NEXT?

- Bi-weekly Core Planning Team (CPT) meetings will continue.
- Miron Construction will review project costs based on 25% progress drawings.
- Plumbing, HVAC, and Electrical engineers will meet with District maintenance staff to review system details and scope of work.
- Bray will continue development of project plans with special attention to typical classroom layouts, placement of cabinetry in all spaces, and design of cafeteria serving spaces.
- Bray will continue development of the building design with views showing how the exterior and interior spaces are taking shape.

## HIGHLIGHTS & MILESTONES | April – July 2020

- The District confirmed its partnerships with Robert W. Baird for bond financing, Bray Architects for architectural design services, and Miron Construction for construction management services.
- A Core Planning Team (CPT), comprised of representatives from district administration, Bray, and Miron, was established to meet on a bi-weekly basis to develop plans for each project.
- School advisory teams for both the elementary and middle school were created by the CPT and have begun giving leadership-level input into the designs of the buildings. As details are refined, more staff members will join in the discussion.
- Site survey field work conducted by Point of Beginning (POB) is complete.
- The district-purchased residential property (on High Street) has been demolished to create space for future elementary and middle school shared parking.
- Site soil borings have been completed, and the geotechnical analysis is expected to determine construction conditions for the projects.

Soil Boring Work in Progress

*Thank You, Community Members*  
for your continued support!

## HIGHLIGHTS & MILESTONES | Continued

- District staff toured recently completed projects in North Fond du Lac, Horicon, and Kewaskum to understand modern learning environments and the design process.
- The District, Bray, Miron, and POB had a preliminary meeting with Village officials to understand the approval process for the projects.
